EDUCATION

Yale University — New Haven, CT May 2030
Bachelor of Science, Computer Science and Applied Math

The Harker School — San Jose, CA May 2026
GPA: 4.00/4.00 (UW), 4.65/4.80 (W) • SAT: 1570 (770 RW, 800 M)

- Relevant Coursework: Data Structures, Neural Networks, Computer Architecture, Robot Kinematics Software, Compilers & Interpreters, Linear Algebra, Discrete Math, Multivariable Calculus, Differential Equations

EXPERIENCE

FRC Team 1072: Harker Robotics August 2022–May 2026
Executive President (25–26), Technical Vice President (24–25), Software Director (23–24)

- Directed **end-to-end robot development** across a **102-member team with a $50K budget**, achieving 2x World Championship Qualification and 2x Offseason Champions
- Maintained a **20K LOC Java control codebase** with 150+ personal Git commits
- **Reduced cycle times by ~20%** by implementing driver-assist **auto-alignment** using real-time **pose estimation** from a Kalman filter fusing odometry, gyro, and vision data
- **Grew membership by 15%** and led 100+ annual meetings, enabling hands-on involvement for all members
- Earned Dean's List Semi-Finalist recognition for exhibiting outstanding leadership capabilities

Garcia Summer Research Scholar - Stony Brook University June 2024–March 2026

- Published **first-author manuscript in MRS Communications** by developing an **ML model** that quantified polydispersity effects on polystyrene thin-film thickness for informing polystyrene coating industrial applications
- Collected 300+ experimental samples and analyzed with **Python** and statistical modeling
- Presented research at MRS, ACS, and APS conferences

PROJECTS

Deep Learning for Medical Signal Analysis August 2024–June 2025

- Improved RBD diagnostic **accuracy from 80% to 97%** by designing an unsupervised deep learning model in **Tensorflow/Keras** to detect the condition from ECG data
- Presented at the 23rd IEEE/ACIS SERA conference as first author, **published in Springer SCIS (top 15 papers)**

Quantum Key Distribution Protocol Simulation June 2023–April 2024

- Validated theoretical QKD security by building **Python Qiskit** simulations comparing QBER across protocols in ideal and noisy environments using IBM Quantum Platform

HONORS

- USACO Gold Division • AIME Qualifier • NCWIT Aspirations in Computing (2x National Honorable Mention) • ACSL Senior Division Bronze Medal (3x Finals Qualifier)

SKILLS

- **Programming:** Java, C++, Python, Git, Linux, TensorFlow, Keras
- **Languages:** English, Mandarin Chinese
